Venus

75 years ago, an alien fleet attacked Earth.  
Without warning. Without mercy. We were not  
prepared. Then the aliens abruptly left. We  
rebuilt. We armed ourselves. We swore: never  
again. The aliens never came back ... until now  
... It's the year 2650. With overwhelming force  
the aliens have returned, striking deep into our  
territory, sending Earth into a panic. Our new  
ships burn like straw. All our careful  
preparations are wasted. Only one man, one  
crew, and the oldest starship in the fleet stand  
between the Earth and certain destruction: ISS  
Constitution. Originally published: La Jolla, CA:  
WildStorm, 2003. Venus has exploded. We  
hoped, desperately, that they came in peace. We

were wrong. Thirty years after the Second Swarm War devastated Earth and its colonies, a powerful, mysterious alien ship has invaded our space. Entire planets are ravaged, whole moons shattered. Any starship sent against it never comes home. But Admiral Proctor, a war hero from our last brush with annihilation, is called out of retirement to take the reins of humanity's newest starship. The ISS Independence and her crew, with Admiral Proctor at the helm, will stand as Earth's last defense. Somehow, against all odds, they will save us, even when our enemy is not just an unstoppable alien ship, but a ghost from humanity's past bent on its utter destruction. And if they fail, we fall. For good. The space mission of a lifetime An epic saga of America's might-have-been, *Voyage* is a powerful, sweeping novel of how, if President Kennedy had lived, we could have sent a manned mission to Mars in the 1980s. Imaginatively created from the true lives and real events, *Voyage* returns to the geniuses of NASA and the

excitement of the Saturn rocket, and includes historical figures from Neil Armstrong to Ronald Reagan who are interwoven with unforgettable characters whose dreams mirror the promise of a young space program that held the world in thrall. There is: Dana, the Nazi camp survivor who achieves the dream of his hated masters; Gershon, the Vietnam fighter jock determined to be the first African-American to land on another planet; and Natalie York, the brilliant geologist/astronaut who risks a career and love for the chance to run her fingers through the soil of another world. The extraordinary autobiography of astronaut Fred Haise, one of only 24 men to fly to the moon In the gripping *Never Panic Early*, Fred Haise, Lunar Module Pilot for Apollo 13, offers a detailed firsthand account of when disaster struck three days into his mission to the moon. An oxygen tank exploded, a crewmate uttered the now iconic words, "Houston, we've had a problem here," and the world anxiously watched as one of

history's most incredible rescue missions unfolded. Haise brings readers into the heart of his experience on the challenging mission--considered NASA's finest hour--and reflects on his life and career as an Apollo astronaut. In this personal and illuminating memoir, illustrated with black-and-white photographs, Haise takes an introspective look at the thrills and triumphs, regrets and disappointments, and lessons that defined his career, including his years as a military fighter pilot and his successful 20-year NASA career that would have made him the sixth man on the moon had Apollo 13 gone right. Many of his stories navigate fear, hope, and resilience, like when he crashed while ferrying a World War II air show aircraft and suffered second and third-degree burns over 65 percent of his body, putting him in critical condition for ten days before making a heroic recovery. In *Never Panic Early*, Haise explores what it was like to work for NASA in its glory years and demonstrates a true ability to deal with the

unexpected. *IN THE AGE OF SURVEILLANCE, HOW CAN A PERSON GO MISSING?* The year is 2187. Crucial Larsen, a veteran of the brutal Consolidation Wars, is working as a labor cop on Earth. The planet is a toxic dump and billions of people are miserable, but so what? It's none of his business. He's finally living a good life, or good enough. But then Essential, his beloved kid sister, disappears on Mars. When Halo--the all-powerful artificial-intelligence overseeing Earth and Mars on behalf of the ruling Five Families--can't (or won't) locate his sister, Crucial races up-universe to find her. In *The Choke*, the frigid, airless expanse outside the luxury domes, Crucial uncovers a deadly secret from Essential's past that threatens to shatter his apathetic existence--and both planets. Blending science-fiction with the classic, hard-boiled detective story, *Gates of Mars* is a page-turning, futuristic thrill-ride featuring a gritty, irreverent anti-hero--Crucial Larsen. The first book of the Halo Trilogy, *Gates of Mars* is the eighth novel

by award-winning authors Clark Hays and Kathleen McFall. Maisie 'Danger' Brown needs excitement. When she wins a harmless-sounding competition to go to astronaut boot camp, that's exactly what she gets . . . But she never imagined it would feature stumbling into a terrifying plot that kills her friends and might just kill her too. Now there's no going back. Maisie has to live by her middle name if she wants to survive - and she'll need to be equally courageous to untangle the romance in her life too. A clever, suspenseful thriller-adventure by New York Times bestselling author and master storyteller Shannon Hale. A surprising and gripping sci-fi thriller with a killer twist The daughter of two astronauts, Romy Silvers is no stranger to life in space. But she never knew how isolating the universe could be until her parents' tragic deaths left her alone on the Infinity, a spaceship speeding away from Earth. Romy tries to make the best of her lonely situation, but with only brief messages from her

therapist on Earth to keep her company, she can't help but feel like something is missing. It seems like a dream come true when NASA alerts her that another ship, the Eternity, will be joining the Infinity. Romy begins exchanging messages with J, the captain of the Eternity, and their friendship breathes new life into her world. But as the Eternity gets closer, Romy learns there's more to J's mission than she could have imagined. And suddenly, there are worse things than being alone.... Now nominated as a YALSA Quick Pick! A sixteen-year-old must battle his way across a thousand miles of deadly lunar terrain and face genetically altered super warriors in his quest to recover an astonishing object that will alter the lives of everyone on the moon . . . and beyond. It's the 22nd Century. A tough, pioneering people mine the moon produce energy for a desperate, war-torn Earth. Sixteen-year-old Crater Trueblood loves his job as a Helium-3 miner. But when he saves a fellow miner, his life changes forever. Impressed by his

heroism, the owner of the mine orders Crater to undertake a dangerous mission. Crater doesn't think he can do it, but he has no choice. He must go. With the help of Maria, the mine owner's frustrating but gorgeous granddaughter, and his gillie—a sometimes insubordinate clump of slime mold cells—Crater must fight both human and subhuman enemies to complete his mission. New York Times bestselling author Homer Hickman (Rocket Boys) will take you on a hold-your-breath adventure across the moon, and you'll never look at the night sky the same way again. The first installment of the Helium-3 series Book #1: Crater Book #2: Crescent Book #3: Crater Trueblood and the Lunar Rescue Company Book length: 75,000 words Includes discussion questions for book clubs From the author of Axis and Vortex, the first Hugo Award-winning novel in the environmental apocalyptic Spin Trilogy... One night in October when he was ten years old, Tyler Dupree stood in his back yard and watched the stars go out. They all flared into brilliance at

once, then disappeared, replaced by a flat, empty black barrier. He and his best friends, Jason and Diane Lawton, had seen what became known as the Big Blackout. It would shape their lives. The effect is worldwide. The sun is now a featureless disk--a heat source, rather than an astronomical object. The moon is gone, but tides remain. Not only have the world's artificial satellites fallen out of orbit, their recovered remains are pitted and aged, as though they'd been in space far longer than their known lifespans. As Tyler, Jason, and Diane grow up, space probe reveals a bizarre truth: The barrier is artificial, generated by huge alien artifacts. Time is passing faster outside the barrier than inside--more than a hundred million years per day on Earth. At this rate, the death throes of the sun are only about forty years in our future. Jason, now a promising young scientist, devotes his life to working against this slow-moving apocalypse. Diane throws herself into hedonism, marrying a sinister cult leader who's forged a

new religion out of the fears of the masses. Earth sends terraforming machines to Mars to let the onrush of time do its work, turning the planet green. Next they send humans...and immediately get back an emissary with thousands of years of stories to tell about the settling of Mars. Then Earth's probes reveal that an identical barrier has appeared around Mars. Jason, desperate, seeds near space with self-replicating machines that will scatter copies of themselves outward from the sun--and report back on what they find. Life on Earth is about to get much, much stranger. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Twenty years ago, the Gaean Trilogy dazzled critics and readers. Now a new generation will discover that brilliant world--beginning with Titan. Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure

he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him? The final book in the New York Times bestselling trilogy, perfect for fans of Battlestar Galactica and Prometheus! FUELED BY LIES. RULED BY CHAOS. ALMOST HOME. Amy and Elder have finally left the oppressive

walls of the spaceship Godspeed behind. They're ready to start life afresh—to build a home—on Centauri-Earth, the planet that Amy has traveled 25 trillion miles across the universe to experience. But this new Earth isn't the paradise Amy had been hoping for. There are giant pterodactyl-like birds, purple flowers with mind-numbing toxins, and mysterious, unexplained ruins that hold more secrets than their stone walls first let on. The biggest secret of all? Godspeed's former passengers aren't alone on this planet. And if they're going to stay, they'll have to fight. Amy and Elder must race to discover who—or what—else is out there if they are to have any hope of saving their struggling colony and building a future together. They will have to look inward to the very core of what makes them human on this, their most harrowing journey yet. Because if the colony collapses? Then everything they have sacrificed—friends, family, life on Earth—will have been for nothing. 2020. Fueled by an

insatiable curiosity, Reid Malenfant ventures to the far edge of the solar system, where he discovers a strange artifact left behind by an alien civilization: A gateway that functions as a kind of quantum transporter, allowing virtually instantaneous travel over the vast distances of interstellar space. It's been decades since anyone set foot on the moon. Now three ordinary teenagers, the winners of NASA's unprecedented, worldwide lottery, are about to become the first young people in space—and change their lives forever. Mia, from Norway, hopes this will be her punk band's ticket to fame and fortune. Midori believes it's her way out of her restrained life in Japan. Antoine, from France, just wants to get as far away from his ex-girlfriend as possible. It's the opportunity of a lifetime, but little do the teenagers know that something sinister is waiting for them on the desolate surface of the moon. And in the black vacuum of space... no one is coming to save them. In this chilling adventure set in the most

brutal landscape known to man, highly acclaimed Norwegian novelist Johan Harstad creates a vivid and frightening world of possibilities we can only hope never come true. This is the complete omnibus edition of the Exodus Trilogy, which has captivated readers all over the world. When an object from space threatens, it becomes clear that humanity needs to reach for the stars in order to survive. With just a few years warning, a race against time begins; to send a starship to a distant planet, where the remains of humanity can survive. Only a small number will be chosen, and among the contenders no one but the most resourceful will stand a chance. In an America turned authoritarian, a small group of dissidents draw up their plans to change not this world, but the next. The confrontation seems inevitable, but who will prevail, and at what cost? A world divided make their separate plans. In desperate times, humanity will show it's darker side, and even the best of intentions can result in the

worst of outcomes. Will human ability for compassion and unity rise up, or succumb to fear and ruthlessness under pressure? And when the starship Exodus leaves for distant Aurora, more than 40 light years away, nobody expects this journey to end up answering some of humanity's greatest and oldest questions: Who are we? Are we alone? Where do we come from? This omnibus edition contains the complete Exodus Trilogy. 1. Exodus 2. Aurora 3. Genesis Wine Dark Deep - A hard science-fiction space opera. Equal parts Star Trek, The Martian, The Moon is a Harsh Mistress and The Expanse - The First Book in the Epic Odyssey of the Spaceship Ulysses and its Crew!When the solar system's key asteroid mine is seized by revolutionaries, it puts the secret mission of the spaceship Ulysses in jeopardy. Without a refueling launch from the asteroid, the survival of the ship and its crew is uncertain. The safest course for the Ulysses? Abandon the mission and limp home. But Cal Scott, captain of the Ulysses, is an astronaut of

the old school and failure is not an option. He has a plan: head straight for the asteroid belt and get their fuel-one way or another. World Fantasy Award Winner Michael Crawford is forced to flee when discovers his bride brutally murdered in their wedding bed. Yet it is not the revengeful townspeople he fears but the deadly embrace of the malignant spirit that is claiming him as her bridegroom. Crawford will not travel alone; soon he is aided by his fellow victims, the greatest poets of his day--Byron, Keats, and Shelley. Together they embark upon a desperate journey, crisscrossing Europe and battling the vampiric fiend who seeks her ultimate pleasure in their ravaged bodies and imperiled souls. Telling a secret history of passion and terror, Tim Powers (The Anubis Gates, Declare, Three Days to Never) masterfully recasts the tragic lives of the Romantics into a uniquely frightening tale. Back in print for the first time since 1994, this newly revised edition of The Stress of Her Regard will thrill both Powers fans

and newcomers to this gripping Gothic tour de force. The continuing epic of Earth's first space colonists--and their fight against a repressive government to reclaim their world in the name of freedom. Discovering a new element, Anti-Ice, a mysterious substance that unleashes vast energies when warmed, a millionaire industrialist dreams of power from an item that promises world peace--or world destruction. Original. The science fiction epic of our time has arrived. Three years ago, an object one hundred miles across was spotted on a trajectory for Earth's sun. Now, its journey is almost over. As it approaches, two competing manned vehicles race through almost half a million kilometers of space to reach it first. But when they both arrive on the entity, they learn that it has been sent toward Earth for a reason. An intelligent race is desperately attempting to communicate with our primitive species. And the message is: Help us. "Last Day on Mars is thrillingly ambitious and imaginative. Like a lovechild of Gravity and The

Martian, it's a rousing space opera for any age, meticulously researched and relentlessly paced, that balances action, science, humor, and most importantly, two compelling main characters in Liam and Phoebe. A fantastic start to an epic new series." —Soman Chainani, *New York Times* bestselling author of the *School for Good and Evil* series "Emerson's writing explodes off the page in this irresistible space adventure, filled with startling plot twists, diabolical aliens, and (my favorite!) courageous young heroes faced with an impossible task." —Lisa McMann, *New York Times* bestselling author of the *Unwanted* series It is Earth year 2213—but, of course, there is no Earth anymore. Not since it was burned to a cinder by the sun, which has mysteriously begun the process of going supernova. The human race has fled to Mars, but this was only a temporary solution while we have prepared for a second trip: a one-hundred-fifty-year journey to a distant star, our best guess at where we might find a new home. Liam

Saunders-Chang is one of the last humans left on Mars. The son of two scientists who have been racing against time to create technology vital to humanity's survival, Liam, along with his friend Phoebe, will be on the last starliner to depart before Mars, like Earth before it, is destroyed. Or so he thinks. Because before this day is over, Liam and Phoebe will make a series of profound discoveries about the nature of time and space and find out that the human race is just one of many in our universe locked in a dangerous struggle for survival. "Baxter has an uncanny gift for mixing a punchy, cyberpunk cynicism with his resolutely hard SF story base. . . . [Exultant] rivals Asimov in its boundless vision for the future evolution of humanity."—Kirkus Reviews (starred review) For more than twenty thousand years, humans have been at war with the alien race of Xeelee. Faced with certain death, a young pilot, Pirius, disobeys orders and travels into the future. Upon his return, Pirius is court-martialed and sentenced to penal

servitude. But it is not only Pirius who pays the price. In flying into the future and back again, Pirius returned to a time before he'd left, a time inhabited by his younger self, who also receives punishment. Commissary Nilis believes that the elder Pirius, whom he dubs Pirius Blue, may know how to defeat the Xeelee. But Nilis can do nothing for Pirius Blue. Instead, he takes the younger Pirius—Pirius Red—back to Earth. There Pirius Red will discover truths that shatter his preconceived notions of all that he is fighting for, while Pirius Blue will learn even harsher truths. But the most shocking revelation of all is still to come. “Absurdly ambitious, technically brilliant, and downright exciting.”—SFX Magazine “Striking . . . chilling . . . [with] a triumphant conclusion.”—Starburst When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders,

but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature. Perfect for fans of action-adventure and historical fiction—including novels by such authors as Bernard Cornwell, Steve Berry, Naomi Novik, and Harry Turtledove—this stunning work of alternate history imagines a world in which the Roman Empire has not fallen and the North American continent has just been discovered. In the year 1218 AD, transported by Norse longboats, a Roman legion crosses the great ocean, enters an endless wilderness, and faces a cataclysmic clash of worlds, cultures, and warriors. Ever hungry for land and gold, the Emperor has sent Praetor Gaius Marcellinus and

the 33rd Roman Legion into the newly discovered lands of North America. Marcellinus and his men expect easy victory over the native inhabitants, but on the shores of a vast river the Legion clashes with a unique civilization armed with weapons and strategies no Roman has ever imagined. Forced to watch his vaunted force massacred by a surprisingly tenacious enemy, Marcellinus is spared by his captors and kept alive for his military knowledge. As he recovers and learns more about these proud people, he can't help but be drawn into their society, forming an uneasy friendship with the denizens of the city-state of Cahokia. But threats—both Roman and Native—promise to assail his newfound kin, and Marcellinus will struggle to keep the peace while the rest of the continent surges toward certain conflict. Praise for *Clash of Eagles* “That rarest and best of alternative histories: the one you believe, the one that makes sense. Alan Smale has a storyteller’s flair for character, and presents an ensemble cast

with a depth of detail of which George R. R. Martin would approve. It works as a novel, as historical speculation, and as cultural extrapolation. But its real value is singular: It’s a ripping good yarn, and one that will keep you reading long past your bedtime.”—Myke Cole, award-winning author of the *Shadow Ops* series “Just when it seems there is nothing new in [alternate] history comes this debut.”—*Library Journal* (starred review) “An intriguingly original alternate history.”—*Kirkus Reviews* “[Smale] breathes life into the New World civilizations and offers up a compelling view of what might have happened had these two continents collided. . . . I found the *New World of 1218 AD* fascinating.”—*Historical Novels Review* “Authoritatively researched, compellingly told, and with pleasing echoes of L. Sprague de Camp, *Clash of Eagles* is a modern masterpiece of what-if speculation.”—Stephen Baxter, Philip K. Dick Award-winning author of *The Time Ships* “Smale has done remarkable work with the

worldbuilding in *Clash of Eagles*, dropping the sole Roman survivor of a massacre into the complex civilization of the Cahokian Native Americans in the thirteenth century.”—Harry Turtledove, New York Times bestselling author of *How Few Remain* “My favorite kind of alternate history: epic, bloody, and hugely imaginative.”—John Birmingham, author of *Without Warning* “Epic in its sweep, exciting in its narrative, and eyeball-kick sharp in its details.”—Nancy Kress, Nebula and Hugo Award-winning author of *Beggars in Spain* “The first book of Alan Smale’s trilogy introduces the series with a lightning bolt. Bracketed between two breathtaking and meticulously strategized battles is a sensitive evocation of a lost culture, an act of literary archeology like no other I’ve read.”—James Patrick Kelly, Nebula Award-winning author of *Burn* Stephen Baxter breaks genre boundaries and brings his unique imagination, epic scope and elegant style to an anthropomorphic fantasy. Starting with the story

of a young female mammoth and the struggle her herd has to survive into the present day on a remote Siberian Island the MAMMOTH trilogy encompasses thousands of millions of years, the geological and climatic history of earth and a vision of a startling future. All via an astounding evocation of mammoth. Life, biology, intelligence, culture, myth and legend. It is a triumph of imaginative story telling. A new ice age. A mysterious object in space. And a desperate mission to save humanity from extinction. Ben Bova, author of *Earth*, continues his exploration of the future of a human-settled Solar System with the science fiction action adventure *Uranus*, the first of his Outer Planets trilogy. On a privately financed orbital habitat above the planet Uranus, political idealism conflicts with pragmatic, and illegal, methods of financing. Add a scientist who has funding to launch a probe deep into Uranus’s ocean depths to search for signs of life, and you have a three-way struggle for control. Humans can’t live on

the gas giants, making instead a life in orbit. Kyle Umber, a religious idealist, has built Haven, a sanctuary above the distant planet Uranus. He invites "the tired, the sick, the poor" of Earth to his orbital retreat where men and women can find spiritual peace and refuge from the world. The billionaire who financed Haven, however, has his own designs: beyond the reach of the laws of the inner planets Haven could become the center for an interplanetary web of narcotics, prostitution, even hunting human prey. Meanwhile a scientist has gotten funding from the Inner Planets to drop remote probes into the "oceans" of Uranus, in search of life. He brings money and prestige, but he also brings journalists and government oversight to Haven. And they can't have that. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Higher dimensional light beings from Venus incarnate as humans to save Earth from a takeover by the Dark Lords of Orion... The dark

side has infiltrated many governments and much of the world of finance. The mission from Venus threatens their planned takeover of Earth. Failing a takeover, the dark lords will cause the planet's destruction through nuclear war, to prevent Earth from ascending to the fourth dimension on the path of light. The volunteer wanderers are all that stand in the way. Praised as "one of the most inventive writers that science fiction has ever produced" (SF Site), national bestselling author Stephen Baxter presents a new saga of a world that could have become our own.... Ten thousand years ago, a vast and fertile plain existed that linked the British Isles to Europe. Home to a tribe of simple hunter-gatherers, Northland teems with nature's bounty, but is also subject to its whims. Fourteen-year-old Ana calls Northland home, but her world is changing. The air is warming, the ice is melting, and the seas are rising. One day Ana meets a traveler from a far-distant city called Jericho—a town that is protected by a

wall. And she starts to imagine the impossible.... What happens when a seventeenth-century bad guy has twenty-first-century technology? An accident with an antigravity machine catapulted Peter Schock and Kate Dyer back to 1763. A bungled rescue attempt leaves Peter stranded in the eighteenth century while a terrifying villain, the Tar Man, takes his place and explodes onto twenty-first-century London. Concerned about the potentially catastrophic effects of time travel, the NASA scientists responsible for the situation question whether it is right to rescue Peter. Kate decides to take matters into her own hands, but things don't go as planned. Soon the physical effects of time travel begin to have a disturbing effect on her. Meanwhile, in our century, the Tar Man wreaks havoc in a city whose police force is powerless to stop him. Set against a backdrop of contemporary London and revolutionary France, *The Time Thief* is the sequel to the acclaimed *The Time Travelers*. It's the year 2030. The oceans have risen rapidly,

and soon the entire planet will be submerged. But the discovery of another life-sustaining planet light years away gives those who remain alive hope. Only a few will be able to make the journey—Holle Groundwater is one of the candidates. If she makes the cut, she will live. If not, she will be left to face a watery death... Strange visitors throw a planet of refugees into chaos in this science fiction adventure by the author of New York Times bestseller *The Uplift War*. Book One in the *Uplift Storm Trilogy* Centuries ago, the Buyur race abandoned Jijo. Now off-limits to settlers, it's warded by guardian machines who will protect the planet until the Institutes of the Five Galaxies declare Jijo ready—in another million years—for new civilization. But mere laws and guardians can't keep out the desperate. Clandestine bands of "sooners" have sneaked down to the lonely planet. Six intelligent races—all refugees—have bickered . . . then built a new society in the wilds of Jijo, hidden beneath forest canopies. Together

they live in harmony—and in fear of the day their illegal colony will be discovered and judgment from the Five Galaxies will rain down upon them. One day a strange starship finally does appear on Jijo. But its owners do not bring law or judgment. Only dire secrets. And they'll do whatever it takes to keep them . . . This ebook features a new introduction by the author. Hugo Award Finalist “A captivating read . . . Brightness Reef leaves you looking forward to more. It's a worthy addition to what promises to be a great science fiction series.” —Star Tribune “Brin is a skillful storyteller. . . . There is more than enough action to keep the book exciting, and like all good serials, the first volume ends with a bang.” —The Plain Dealer “A universe that's immensely appealing, leaving readers hungry for more of this exciting, epic adventure.” —Publishers Weekly “Tremendously inventive, ambitious work.” —Kirkus Reviews “A timely, science fictional contemplation of the refugee experience.”—Santa Fe Reporter

“Reading Manifold: Time is like sending your mind to the gym for a brisk workout. If you don't feel both exhausted and exhilarated when you're done, you haven't been working hard enough.”—The New York Times Book Review The year is 2010. More than a century of ecological damage, industrial and technological expansion, and unchecked population growth has left the Earth on the brink of devastation. As the world's governments turn inward, one man dares to envision a bolder, brighter future. That man, Reid Malenfant, has a very different solution to the problems plaguing the planet: the exploration and colonization of space. Now Malenfant gambles the very existence of time on a single desperate throw of the dice. Battling national sabotage and international outcry, as apocalyptic riots sweep the globe, he builds a spacecraft and launches it into deep space. The odds are a trillion to one against him. Or are they? “A staggering novel! If you ever thought you understood time, you'll be quickly

disillusioned when you read *Manifold: Time*.”—Sir Arthur C. Clarke Picking up the saga directly where *The Ruins of Mars* left off, *Waking Titan* continues the narrative of Harrison Raheem Assad and the Mars Mission as they explore the caves beneath the Martian ruins. Underground in the great statue chamber, Harrison and his team struggle to come to terms with the discovery of two apparently different alien races depicted in stone. However problematic this new revelation may be, it is Braun, the team's AI, who truly sees just how far the influence of the mysterious race has reached. Echoing through time and space, a force drives Braun far from his programmed limitations and into a reality that is fractured and broken. Meanwhile, Harrison and the Mars team push ever deeper into the caves propelled by discovery, tragedy, and blind human perseverance. They search for answers they hope will be worth the price they paid to find them. Attacks from outside forces, both physical

and metaphysical, descend upon Mars and Earth with devastating effects. These events come like cosmic tsunamis, giving credence to the warnings Braun so blindly followed and shift the direction the team takes to uncover the truth. Death, enlightenment, betrayal, and love texture the backdrop upon which *Waking Titan* is projected. The second novel in the *Ruins of Mars* Trilogy is about more than just a simple mission to Mars. The events in this installment grow to encompass not only the fate of the crew but that of all life in the solar system. Jordan Kell and his team return to a vastly changed Earth, where greenhouse flooding and climate shifts have transformed society and nobody wants to hear their warning about a radiation wave that is threatening all life on the planet. Signs of life have been found on Titan, Saturn's largest moon. A gripping science fiction thriller where five women task themselves with ensuring the survival of the human race—if you mixed ". . . *The Martian* and *The Handmaid's Tale*, this sci-fi

novel would be the incredible result" (Book Riot). "Best of 2020" -Library Journal "Best of 2020" -Kirkus "Best of 2020 - runner up" -Polygon "Our favorite books of 2020" -GeekDad

Despite increasing restrictions on the freedoms of women on Earth, Valerie Black is spearheading the first all-female mission to a planet in the Goldilocks Zone, where conditions are just right for human habitation. It's humanity's last hope for survival, and Naomi, Valerie's surrogate daughter and the ship's botanist, has been waiting her whole life for an opportunity like this - to step out of Valerie's shadow and really make a difference. But when things start going wrong on the ship, Naomi begins to suspect that someone on board is concealing a terrible secret - and realizes time for life on Earth may be running out faster than they feared . . . "Goldilocks is a thrilling, character-driven space opera", perfect for readers of *The Martian*, *The Power*, and *Station Eleven* (Shelf Awareness). The fascinating story

of how NASA sent humans to explore outer space, told through a treasure trove of historical documents--publishing in celebration of NASA's 60th anniversary and with a foreword by Bill Nye "An extremely useful and thought provoking documentary journey through the maze of space history. There is no wiser or more experienced navigator through the twists and turns and ups and downs than John Logsdon." -James Hansen, New York Times bestselling author of *First Man*, now a feature film starring Ryan Gosling and Claire Foy Among all the technological accomplishments of the last century, none has captured our imagination more deeply than the movement of humans into outer space. From Sputnik to SpaceX, the story of that journey--including the inside history of our voyages to the moon depicted in *First Man*--is told as never before in *The Penguin Book of Outer Space Exploration*. Renowned space historian John Logsdon traces the greatest moments in human spaceflight by weaving together essential,

fascinating documents from NASA's history with his expert narrative guidance. Beginning with rocket genius Wernher von Braun's vision for voyaging to Mars, and closing with Elon Musk's contemporary plan to get there, this volume traces major events like the founding of NASA, the first American astronauts in space, the Apollo moon landings, the Challenger disaster, the daring Hubble Telescope repairs, and more. In these pages, we such gems as Eisenhower's reactions to Sputnik, the original NASA astronaut application, John Glenn's reflections on zero gravity, Kennedy's directives to go to the moon, discussions on what Neil Armstrong's first famous first words should be, firsthand accounts of spaceflight, and so much more.
