Discusses statutory authority the Department of Children and Families (DCF) has to remove a child from his home without parental consent, what the standards for removal are, and for any information available on the Abric case as reported in the October 1, 1998 Hartford courant. This document provides the technical basis for removal of the 221-T Tunnel from airborne radiological control. T Plant Radiological Control has evaluated air sampling data and engineering controls, and determined the necessary administrative controls to make this transition. With these administrative controls (specified within document) in place, the tunnel can be removed from Airborne Radioactive Area status. The removal of the tunnel from airborne status will allow work to be performed within the tunnel under controlled conditions, as outlined in this technical basis, without the use of respiratory protection equipment. The book presents a sequential approach for the treatment of dye wastewater, presenting state-of-the-art techniques based on recent findings. The release of these dyes into the environment is a major threat due to their toxicity, mutagenicity and carcinogenicity and their biotransformation products. It has been at least two decades since researchers have been trying to find interactions between dye molecules and water media, and find new purification methods. This book plays an important role in this field by highlighting the cutting edge results in dye removal and remediation, and discusses in detail the application of various physical, chemical, and biological techniques for the removal of pollutants from water. Case involving the will of Frederick May. "The Five Civilized Tribes are among the best known Native American groups in American history, and they were even celebrated by contemporary Americans for their abilities to adapt to white culture. But tragically, they are also well known tribes due to the trials and tribulations they suffered by being forcibly moved west along the Trail of Tears. Though the Trail of Tears applied to several different tribes, it is most commonly associated today with the Cherokee. The Cherokee began the process of assimilation into European America very early, even before the establishment of the Unites States, but it is unclear what benefits that brought the tribe. Throughout the colonial period and after the American Revolution, the Cherokee struggled to satisfy the whims and desires of American government officials and settlers, often suffering injustices after complying with their desires. Nevertheless, the Cherokee continued to endure, and after being pushed west, they rose from humble origins as refugees new to the southeastern United States to build themselves back up into a powerhouse both economically and militarily. The Cherokee ultimately became the first people of non-European descent to become U.S. citizens en masse, and today the Cherokee Nation is the largest federally recognized tribe in the United States, boasting over 300,000 members. The Creek became known as one of the Five Civilized Tribes for quickly assimilating aspects of European culture, but in response to early European contact, the Muscogee established one of the strongest confederacies in the region. Despite becoming a dominant regional force,

however, infighting brought about civil war in the early 19th century, and they were quickly wrapped up in the War of 1812 as well. By the end of that fighting, the Creek were compelled to cede millions of acres of land to the expanding United States, ushering in a new era that found the Creek occupying only a small strip of Alabama by the 1830s. With the Spanish Empire foundering during the mid-19th century, the young United States sought to take possession of Florida. President Andrew Jackson's notorious policy of Indian Removal led to the Seminole Wars in the 1830s, and that was already after General Andrew Jackson had led American soldiers against the Seminole in the First Seminole War a generation earlier. The Seminole Wars ultimately pushed much of the tribe into Oklahoma, and the nature of some of the fighting remains one of the best known aspects of Seminole history among Americans."--Introduction. Considers legislation revising procedures for disqualifying judges from hearing particular cases. Does not discuss removal of judges from office. The work plan for removal and burial of fabrication equipment used for the fabrication of plutonium weapon components from 1949 to 1965 is outlined. (JSR).
